Re: USA and EU FDA compliant urethane

The standard ester and ether polyurethane elastomers presently produced by Argonics, Inc. can be formulated to be compliant with United States Food and Drug Administration (FDA) regulations for dry food applications.

All of the chemicals used in the manufacture of this material are listed in the USA FDA Code of Federal Regulations (CFR) Title 21. Polyurethane products are listed in parts 177.1680 (iso and polyol), and rubber articles in part 177.2600. Other proprietary components are listed in parts 175.105, 176.170, 176.180 and 178.3297 (pigment). The vehicle used in the creation of the pigments complies with the CFR Title 21 sections 175.300, 175.320 and 177.2420.

Additionally, the polyurethane manufactured by Argonics complies with European Union (EU) regulation number 10/2011 based on our interpretation and documentation provided by our raw material suppliers.

Sincerely,

Brandon Holman
Chemical Control Specialist
Argonics, Inc.
